

# Ikpabi Sunday Ele

## Back-End Software Engineer

Result-Oriented Back-end Software Engineer with 4 years + experience, aiming to leverage proven team work and creative thinking skills to create and maintain scalable and efficient server-side applications. I can be relied upon to design and implement RESTful APIs that can be consumed by front-end developers and other third-party applications. Implementing security measures such as encryption and authentication to protect sensitive data and prevent unauthorized access.

## WORK EXPERIENCE

### Back-End Engineer Big Stack Technology

05/2021 - 02/2022

*Achievements/Tasks*

- Created and maintained a scalable and efficient server-side application that increased user engagement by 30%!
- Implemented security measures such as encryption and authentication to protect sensitive data and prevent unauthorized access!
- Designed and implemented RESTful APIs that was consumed by the front-end developers, while working on 20+ microservices for 5 clients!
- Stayed up-to-date with new technologies and trends in server-side development to ensure the use of best practices and the latest tools!

## EDUCATION

### Bachelor's Degree, Computer Science Cross River University of technology/ Calabar

01/2019 - 12/2023

*Calabar, Nigeria*

*Computer science*

- Object Oriented Programming
- System Analysis and Design
- Analysis of Algorithm

## SKILLS

Node.js

Express.js

MongoDb

MySQL

RESTful API

Authentication & Authorization

Git/Github

Test-driven development (TDD)

Agile development methodologies

## PERSONAL PROJECTS

BookStore App (02/2023 - 03/2023)

Portfolio Website (04/2023 - 05/2023)

Currency Coverter App (06/2024 - 07/2024)

## CERTIFICATIONS

UDEMY CERTIFICATE OF COMPLETION : React Native, Redux & Express - Full Stack React Native

## LANGUAGES

English Language

*Full Professional Proficiency*

## INTERESTS

LAMP Stack

Artificial Intelligence

Data Analysis

Cloud Computing
